

MALIK MUHAMMAD NOUMAN AMJAD
Software Engineer | AI Engineer | Machine Learning Engineer

Pakistan | Email: n.amjadbse@gmail.com | GitHub: github.com/Nadevx | LinkedIn: linkedin.com/in/maliknoumanamjad

PROFESSIONAL SUMMARY

Software Engineer with a Bachelor's degree in Software Engineering and currently pursuing a Master's degree in Artificial Intelligence at Air University, Islamabad. Skilled in Machine Learning, Deep Learning, Computer Vision, and Python-based AI development. Experienced in building AI solutions involving medical image analysis, explainable AI, image classification, and natural language processing. Interested in developing reliable, scalable, and impactful intelligent systems for real-world applications.

EDUCATION

MS Artificial Intelligence (In Progress)	Air University, Islamabad
Relevant Areas: Artificial Intelligence, Machine Learning, Deep Learning, Computer Vision	
BS Software Engineering	Virtual University of Pakistan
Relevant Areas: Software Development, Programming, Database Systems, Software Engineering Principles	

TECHNICAL SKILLS

Programming Languages: Python, Java, C++, JavaScript, HTML, CSS
Artificial Intelligence & Machine Learning: Machine Learning, Deep Learning, Neural Networks, Computer Vision, Natural Language Processing, Explainable AI
Frameworks & Libraries: TensorFlow, Keras, PyTorch, Scikit-Learn, OpenCV, NumPy, Pandas
Tools & Platforms: Git, GitHub, Jupyter Notebook, VS Code

PROJECT EXPERIENCE

- Medical Image Analysis Projects
- Developed deep learning-based classification systems for healthcare applications including disease prediction, breast cancer detection, skin cancer detection, and pneumonia detection using convolutional neural networks and computer vision techniques.
- Explainable AI for Healthcare Risk Prediction
- Implemented machine learning models for patient risk prediction and explored model interpretability techniques using SHAP and LIME to understand AI decision-making.
- Fake News Detection System
- Developed a natural language processing classification system to analyze text data and identify misleading information using machine learning approaches.
- Facial Emotion Recognition System
- Developed a computer vision-based emotion classification system using deep learning techniques for facial expression analysis.

RESEARCH INTERESTS

Explainable Artificial Intelligence (XAI) | Medical Artificial Intelligence | Computer Vision | Vision Transformers | Deep Learning | Remote Sensing AI Applications

INTERNSHIP EXPERIENCE

- AI / Machine Learning Internship Projects
- Completed practical AI projects involving:
- Disease Prediction
 - Breast Cancer Classification
 - Skin Cancer Detection
 - Pneumonia Detection
 - Facial Emotion Recognition
 - Fake News Detection
 - Data Analysis and Machine Learning Tasks

CAREER OBJECTIVE

Seeking opportunities as an AI Engineer, Machine Learning Engineer, or Software Engineer where I can apply software engineering principles and artificial intelligence techniques to develop impactful intelligent systems. I aim to contribute to innovative AI-driven solutions while continuously improving my expertise in machine learning, deep learning, and modern software development practices.
